Mobile: +91 7569152703

Professional Summary:

- Having around 3 months of experience in Configuration Management, Build & Integration, and Release activities, I have honed a comprehensive skill set that includes:
- **Kernel Integration and Release Management:** Demonstrated expertise in integrating kernel merge tags from open-source Google repositories, with hands on experience across various kernel versions, including 5.4.c29, 5.15.c1 and 5.15.c4.
- **Configuration Management Tools:** Proficient in utilizing Git and GitHub for version control and configuration management, ensuring seamless code integration and repository maintenance.
- **Conflict Resolution and Bug Fixing:** Adept at identifying, resolving, and mitigating code conflicts and bugs, thereby enhancing code quality and stability.
- **Software Development Life Cycle (SDLC):** In depth understanding of the SDLC and Defect Life Cycle, facilitating efficient project management and delivery.
- **Bug Tracking and Management:** Extensive experience with JIRA and Orbit for tracking, managing, and resolving software defects.
- **Linux and Integration Techniques:** Strong foundational knowledge of Linux operating system concepts and integration methodologies.
- **Comprehensive Software Development:** Hands on experience in analysis, coding, testing.
- **Rapid Learning and Adaptability:** Proven ability to quickly assimilate new concepts and technologies, demonstrating exceptional learning agility.

Professional Details:

- Working as Traniee Software Engineer in Innominds Software Private Limited from May2025 to till date.

Education:

- B. Tech | Vidya Jyothi Institute of Technology | EEE | 2020-2024 | 70%

Technical Skills:

Operating Systems	Windows, Linux.
Version Control	Git, GitHub.
Languages	C, Java.
Qualcomm Tools	PCAT, QFIL, ADB Commands, Orbit
Integration Tools	Gerrit, Tiberium, Putty, Cloud Bees, Polaris, Confluence, CI & CD, JIRA

Project Experience:

Project-1:

Project Details: **Qualcomm Kernel LTS**

Role: Traniee Software Engineer

Duration: Jun2025 – Present

Description: Focused on the Build and Release of Kernel merge tags from Google's open-source repository, ensuring seamless integration and enabling the testing team to obtain accurate and timely results.

Responsibilities:

- **Kernel Integration & Code Management:** Worked extensively with Linux kernel versions 5.4.c29, 5.15.c1, and 5.15.c4, handling branching, merging, conflict resolution, and patch porting to mainline branches while ensuring code stability and integrity.
- **Build & Release Engineering:** Led CI/CD-driven software integration, resolving compilation issues, maintaining build pipelines, and delivering production-ready releases to clients.
- **Automation & Failure Analysis:** Triaged build, load, boot, and test failures occurring at various automation stages, collaborating with development and QA teams to identify root causes and implement corrective actions.
- **CI/CD & Deployment:** Spearheaded Gerrit-based code reviews, approvals, and integrations, aligning with customer CI pipelines for smooth deployments, feature enablement, and timely software releases.
- **Bug Tracking & Issue Resolution:** Utilized JIRA, Orbit, and resolve integration-related defects, ensuring seamless software delivery.
- **Customer Engagement & Migration:** Successfully executed customer-specific software migrations, integrating proprietary codebases with customized configurations, maintaining compliance with industry standards.
- **Version Control & Developer Enablement:** Provided Git and Repo tool expertise, training developers on branching strategies, release management, and integration best practices to enhance productivity.

- **Sanity Testing & Verification:** Conducted build flashing, sanity testing, and validation, ensuring compatibility, performance, and reliability before production deployment.
- **Cross-Functional Collaboration:** Engaged with development, QA, and operations teams, ensuring smooth feature integrations, resolving software dependencies, and enforcing best practices in software release cycles.

Achievements & Recognition:

- Got the first prize in Robotics Domain in college level Project Expo(2024).

Place: Hyderabad
